DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8 are allowed.
2. The drawings filed on 01/16/2004 are acceptable.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or render obvious the claimed combination including a motor generator having a function of at least one of a motor and a generator interlocked with a crankshaft of the internal combustion engine; a first detecting unit for detecting a rotation position of the motor generator; a second detecting unit for detecting a crank angle of the crankshaft; a rotation direction detecting unit for detecting a rotation direction of the internal combustion engine based on the rotation position detected by the first detecting units, and an estimating unit for estimating a stop position of the internal combustion engine based on the rotation position of the motor generator and the crank angle, wherein the estimating unit estimates the stop position of the internal combustion engine based on the crank angle generated by counting a number of crank pulses in the rotation direction of the internal combustion engine detected by the rotation direction detecting unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copies of U.S. Patent are not provided pursuant to MPEP 1302.12.
